Languages

Spanish (native)
English (proficient, C2)
French (proficient)

Programming

Experienced in:
JavaScript
TypeScript
PHP

Basic knowledge of:
Python and **Lua**.

See most of my work on
Github.

Experience

Since 2018	**Technical maintainer**	Wikipedia

I have been a technical maintainer at Wikipedia since 2018, among my tasks we may find:

- Maintenance and support for modules written in Lua in both open and protected pages as a template editor (flag awarded by community consensus)
- Creation and fix for templates, making use of Mediawiki's parser functions and logic
- Modifications to the Spanish Wikipedia UI (CSS)
- Development of scripts that improve user experience, in Javascript.
- Resolution of technical requests through the technical board.

Education

2022–2023 **MSc in Web development** — Universitat Oberta de Catalunya, Spain
Average grade: 9.39/10
Knowledge in frameworks such as Angular (TS), Laravel (PHP), Tailwind and Bootstrap (CSS); as well as design tools such as Figma and module bundlers like Webpack and Parcel.

2009–2014 **BSc in linguistics and translation** — Universidad de Granada, Spain
Specialized in applied linguistics

Projects

2021–2023 **Twinkle Lite** — MediaWiki/Wikipedia, Spain
I am the sole developer of the maintenance tool Twinkle Lite on the Spanish Wikipedia, written in JS and making use of MediaWiki's API as well as the Morebits library. TL allows Wikipedia verifiers and patrollers to perform maintenance actions more quickly as it automatizes them. It is used by the majority of maintainers on the Spanish Wikipedia.

2020–2023 **Leadership of Wikiprojects** — Wikipedia
Dealt with tasks regarding the management of events and communities related to articles in key areas. Carried out the mentorship and onboarding of newcomers and took part in the definition of guidelines and best practices for articles with area experts.
